Education

Georgia Insitute of Technology

Certificate - Full Stack Flex Web Development

Projects

MovieHunter | [Github](#) | [Deployed](#)

Team Member

- An easy way to get movie ideas and find streaming sources for the busy person on the go
- Uses local storage and third-party APIs to provide search functionality for the front-end application. My responsibilities included most of the HTML and all of the CSS
- Tools/ Languages: HTML, CSS, JavaScript, APIs

Yeet-a-Job | [GitHub](#) | [Deployed](#)

Team Member

- A job board for employers, and perspective employees, to find new opportunities
- Created with Handlebars on the front end, Express for routing, and MySQL on the back end for this full stack application. I was responsible for most of the Handlebars and CSS
- Tools/ Languages: HTML, CSS, JavaScript, Handlebars, Node.js, Express, MySQL, Sequelize

QuizMaster | [Gitub](#) | [Deployed](#)

Team Member

- An app for making and selling quiz card decks for trivia nights, studying, or entertaining
- A full stack React application featuring Mongoose for the back-end complete with a Stripe Payment system and a login feature. My part was the React layout, some of the React pages, and all of the CSS
- Tools/ Languages: React, CSS, Node.js, Express, Semantic UI, Stripe, Mongo, GraphQL

Recent Work Experience

Powertrain Automotive LLC DBA AAMCO
